

LOCATE FUEL STATEWIDE

LOUISIANA FUEL TEAM

The **Louisiana Department of Natural Resources (DNR) Fuel Team** website is designed to aid residents, businesses and evacuees prior to and during a disaster by quickly identifying service stations within the state that have (or do not have) fuel for sale. Icons depict the availability of both gasoline and diesel. The information is updated by DNR and private entities on a regular basis.

Click on the **"Database"** hyperlink [or click on the **map image** located in the lower right hand side of page]. Zoom in on any area of the state map and it will display color coded icons for service stations indicating their status. You can select all stations or those near evacuation routes. Click on the **icon** and a pop up window will provide the station name. Click **"List Stations in Area"** and a full list of stations, addresses, telephone numbers, status (open or closed) and types of fuel available (gas and diesel) will be displaced.
