WINDSTORM

WHEN STRONG WINDS AFFECT THE AREA YOU ARE IN:

Follow the same precautions for high winds that you would for tornado:

At home, school or at work:

- Go to an interior hallway or small interior room, on the lowest floor, such as a bathroom or a closet.
- Stay out of structures with wide free-span roofs like auditoriums and gymnasiums.
- Avoid windows.
- Do not remain in a trailer or mobile home when high winds and strong gusts are present. Take cover in a sturdier building or in a ditch if possible.
- If you are in a high-rise building, go to the most interior rooms or hallways.

If you are in an automobile or outside:

- Seek cover in a nearby building, or lie flat in a ditch or ravine.
- Avoid seeking shelter under an overpass or bridge.
