KENNER MAYOR MICHAEL GLASER BRINGS CONVENIENCE AND ACCESSIBILITY WITH LAUNCH OF NEW CITY WEBSITE

Kenner, LA. – (APRIL 26, 2023) The City of Kenner launched a new website on Wednesday, April 26 at 11:00 a.m. announced Mayor Michael Glaser. The city's previous website launched in August of 2011, and had not undergone any redesign or feature additions since established.

"A website is in many ways a first impression. It's important that the initial impression of the City of Kenner shows that our government is forward thinking and innovative in our public information resources. The new capabilities, including those for mobile access, via the more modern site is leaps and bounds from where we were. That's why I'm proud to announce the launch of the city's new website, as this is an update that was long overdue," said Mayor Michael Glaser.

One of the new website's primary features is its easy accessibility to government documents such as council agendas, bids and contracts. Additional features also include email notification alerts, ADA compliance verifications, enhanced security features, the capability to make payments online and the option to view the website in 32 different languages.

Innovative and integrated technology solutions, including a robust and polished website, is vital to attract new residents and businesses. This is another step the city is taking to ensure that conducting business and connecting with the city is convenient and user friendly. The city acknowledges that there are additional website updates that need to be made in order to utilize the website's full capabilities and envision an "online city hall." Users will continue to see interaction improvements over the next few months.

To view the city's website, visitors will utilize the same URL: www.Kenner.La.Us
